**For Immediate Release**

**Mega Volume meets Micro Footprint with the MSPA5 Powered Micro Spot from Galaxy Audio**

Galaxy Audio introduces the Powered Micro Spot, model MSPA5. The MSPA5 incorporates design features of both the PA6S Powered Hot Spot & Powered Nano Spot, while maintaining a compact design. The Micro Spot Series is designed for a wide array of applications: churches, schools, courtrooms, fixed installations, or on stage. The MSPA5 is powered by a 100 watt amplifier, delivering quality sound through the specially designed 5" full range ceramic speaker, providing superior vocal clarity. The Powered Micro Spot will accept mic or line level with its XLR (+48V phantom power), 1/4", or 1/8" input.

Volume and EQ controls are conveniently located on the front panel. Additionally, the built in compressor/limiter helps prevent signal clipping. The Powered Micro Spot can be mounted to a mic stand or a wall/ceiling mounting bracket with the included hardware.

Galaxy Audio MSPA5 Powered Micro Spot will be available from all Galaxy Audio dealers and distributors.

**Street Price**  
**MSPA5 - \$199.99**

**Availability: Currently Shipping**
